Darlington. CONSTANCY. The Education of the Heart.

It is the vice of the age to substitute learning for wisdom-to educate the head, and forget that there is a more important education necessary for the heart. The reason is cultivated at an age when nature does not furnish the elements necessary to a successful cultivation of it; and the child is solicited to reflection, when he is only capable of sensation and emotion. In infancy the larvæ of the moth called Carpocapsa the attention and the memory are only excited strongly by things which impress the senses, and move the heart, and the father can instil more solid and available instruction in an hour spent in the fields, where wisdom and goodness are exemplified, seen | States, but we have occasionally met with and felt, than in a month spent in the study where they are expounded in stereotyped

WOMAN AS SHE SHOULD BE,-Give ear fair daughter of innocence, to the instructions of prudence, and let the precepts of barrels of Bologna sausages were shipped truth sink deep in thy heart; so shall the charms of thy mind add lustre to the elegance of thy form; and thy beauty, like the rose it resembles, shall retain its sweetness when its bloom is withered.

Remember thou art man's reasonable companion, not the slave of his passions .-The end of thy being is to assist him in the to ilsof life, to soothe him with thy tenderness. and to recompense his care with soft endearments.

Who is she that wins the heart of man. that subdues him and reigns in his breast? Lol yonder she walks in maiden sweetness, with innocence in her mind, and modesty on her cheek.

She is clothed with neatness, she is fed with temperance; humility and meckness

are as a crown of glory encircling her head. Decency is in all her words, in her answers are mildness and truth.

When virtue and modesty enlighten her charms, she is beautiful as the stars of heaven. The innocence of her eye is like that of the turtle; simplicity and truth dwell in her heart.

She presides in the house, and there is peace; she commands with judgement, and is obeyed. The care of her family is her delight; to that she applies her study; and elegance with frugality is seen in her mansion. The prulence of her management is an honor to her husband, and he hears her praise with a secret delight.

She informs the minds of her children with wis lom; she fashions their manners from the example of her own goodness .-The word of her mouth is the law of their youth, the motion of her eye commands obedience.

In prosperity she is not puffed up; in adversity she heals the wounds of fortune with patience. The troubles of her husband are alleviated by her counsels, and sweetened by her endearments.

THE APPLE-TREE WORM. There is a most mischievous enemy of he apple, that attacks the fruit only; and where it prevails is known as the apple worm. It is a true caterpillar, not a grub like the plum and cherry weevils; and is pomonella, the codling or fruit moth. In some years this apple worm has been so common in New England that a very large part of the apples were rendered worthless by it. It is very rare in the interior of the 1', and it is to be apprehended it will become still more common. The surest mode of destroying the apple worm, is to allow swine to run in the orchard to gather all the fruit that first falls; or where this cannot be done, to pick them up by hand and feed them to some animal. The plum weevil and the apple worm are distinct insects. The plum weevil has been found in the apple, but the apple worm never in the plum.

Cotton Press.

We offer to the citizens of Abbeville and the adjoining Districts, our improved SWING. ING FULCRE PRESS. The invention was not the result of mere chance, but of long experience and mathematical calculation. As to power, it is equal, if not superior, to any thing now in use. It requires less tim-ber, easier framed, and put up in less time, and with less danger than a screw; and the Press will last as long as any timber protected from the weather or above ground. From the number of these Presses which are now in use from North Carolina to Mexico, we feel no hesitancy in saying that they will supercede the Screw; and there are ten of our Presses up to one of any other, and we feel justified in saying fifty to one. The average duration of Screws in this District is not more than four and a half or five years, and as there is not less than five hundred Screws, see what is paid out in one year.

For single or individual rights, \$15.00. We offer the District rights for sale on very low terms, which we consider a greater speculation than there is in the country.

Persons wishing information respecting the Press, will find me for two weeks to come at the residence of Mr. James Cobb. I will build one more Press in this District for \$50, build one more Press in this every thing found to hand.
